

FireWall Valve LLC

For Fire Protection Valves

UL/FM LUG Butterfly Valve - Ductile Iron, Fire Protection, Normally Closed, UL Listed, FM Approved Lug Style Model FW3000

Valve pressure rating 250 psi wwp
Lug style
EPDM molded-in seat liner
Designed for normally closed position monitoring
Ductile iron disc
Stainless steel stem with copper bushings
Geometric drive
Extended neck
Operating mechanism: Manual gear operator
UL/ULC Listed
FM Approved
UL Listed for Indoor and Outdoor Service
Conforms to MSS SP-67
Size range 2½" to 12"

UL/FM ductile iron butterfly valve is designed specifically to meet the rigorous requirements of automatic sprinkler systems. The unique EPDM molded-in seat liner with ductile iron disc provides bubble-tight shutoff at rated pressure. These valves are installed and monitored in fire protection applications where they remain in the normally closed position. A typical application would be fire pump test bypass lines. With the internal stem/disc geometric drive design there is no need for pins or bolts that may create leak paths or turbulence in the waterway
